Lex Products is pleased to announce the reinstatement of the finished goods inventory program. Over the course of the past few months, Lex has taken the necessary steps to build a robust inventory of some of our most popular power distribution boxes and cable assemblies at our east coast facility.

Lex Products understands that the need to support tight deadlines and high volume demand is critical to the industry we serve. Having a consistent stock of finished goods can aid in solving problems especially when emergencies arise.

To obtain a list of what is currently in stock please check with your local sales representative. Additionally, you may request to have a list provided to you electronically on a weekly basis. As we work to continuously improve upon this program, we will focus on managing the products and quantities kept in stock, based on popularity and seasonality.

We hope that you find the finished goods inventory to be a useful tool that will help not only meet but exceed your expectations. Stay tuned to hear more about the programs and initiatives focusing on increased customer satisfaction, that Lex Products has coming up in year 26.

Sincerely,

Bob Luther
CEO and Founder,
Lex Products Corporation
