Lex Pro Audio CACOM-8 Barrel Adapter

Connects CACOM-8 Cables

Features & Benefits

- *Compatible with any CACOM-8 extension*
- *Allows users of CACOM-8 cable to expand their capabilities with extensions*
- *Heavy duty, durable PVC body with aluminum stand-off*
- *Industry standard machined aluminum CACOM-8 plug and connector*

Catalog Number:

LPA-CA8-BRL

Description:

CACOM-8 male to female barrel adapter without locking rings.

Typical Application:

Typical CACOM-8 extension cables contain a male and female wiring device with locking rings on both ends to allow the connection to panel mount devices without locking rings. This configuration does not permit users to connect multiple cables together as extensions. Lex Products CACOM-8 adapter is a device with male and female connections without locking rings to connect cables together to extend the length of a CACOM-8 cable. Used to create longer CACOM-8 extension cords by joining existing cables with locking rings together.

Markets Served:

Theatrical, Concert Touring, Live Events, Systems Rental and Permanent Installations
