XXX insert cable length

### Ethercon® to RJ-45 Adapter

Neutrik® Ethercon® cables last far longer than standard RJ-45 cables because the contacts are protected by a heavy duty aluminum shroud. But the shroud prevents the cables from connecting to standard RJ-45 jacks. The Ethercon® to RJ-45 Adapter allows Neutrik® Ethercon® cables to be plugged into standard RJ-45 jacks

Description	Catalog No.
Standard RJ-45 to Neutrik® Ethercon® Adapter. 12" long	RJ45-RJ45E
