

## PinSaver™ Stage Pin Shroud Adapter

### The PinSaver™ Solution

Crushed or bent stage pins have been an industry problem for decades, resulting in overheating and device failure. The PinSaver's shroud design protects exposed brass pins from damage during use and transportation and maintains proper mating and retention between male and female connectors.

Weather-resistant neoprene shroud gaskets help prevent infiltration of moisture and contaminants when devices are mated. PinSaver helps avoid costly downtime and repair or replacement of male pins and extends the life of stage pin extensions.

### Features & Benefits:

- Mates with Lex EverGrip® Molded Stage Pin Extensions, Group 5®, Bates®, Mole-Richardson® and Paladin® 100 Amp 125 Volt stage pin connectors
- Rugged impact-resistant thermoset silicone rubber construction
- Solid brass pin/contact design provides excellent conductivity
- Amperage and voltage rating are “molded in” on both sides of adapter
- Molded in thru-hole to conveniently fasten tie line for cable support
- Matte black exterior
- Flammability - Meets UL 94 V0 material classification

### Catalog Number:

PS100125

### Description:

100 Amp 125 Volt Stage Pin Shroud Adapter

### Typical Application:

For use with 100 Amp 125 Volt stage pin extensions. Shroud Adapter attaches to male connector to prevent damage to male pins.

### Markets Served:

Motion Picture and Television Production

**Convenient pin lock feature securely attaches shroud adapter to male connector ground pin for easy installation and removal**

**Shroud design prevents crushed or bent brass pins and maintains proper mating and retention between male and female connectors**
