

PCS TRIO™

Triple Single Pole Relay Module (RRR)

Catalog Number:
PCS-A-MD-RRR

General Information:

The Triple Single Pole Relay Module is responsible for the switching of three 20 Amp 120 Volt AC power circuits.

PCS TRIO™ represents a revolution in power management by controlling power to Incandescent Loads, LEDs, Moving Lights and other applicable equipment. The patent pending design of the PCS TRIO™ power architecture enables power control over the widest lighting schedule possible in a single panel.

See additional materials for detailed information.

Triple Single Pole Relay Modules are fully compatible with the entirety of the Lex Products PCS TRIO™ Module Chamber series of power control products.

Markets Served:

Entertainment, Architectural

PCS TRIO™

- Revolutionary new panel merges the power regulation of LEDs, moving lights and incandescents into a single unit
- Significant convenience and cost-efficiency is achieved through reductions in the installation of cabling and conduit
- Patent-pending bussing design provides all phases of power at each module location

See individual datasheets for details

PCS TRIO™

Plenum Module (PPP)

Catalog Number:
PCS-A-MD-PPP

General Information:

The Plenum Module maintains the cooling and communication integrity of a Module Chamber by occupying slots where other modules are not required.

PCS TRIO™ represents a revolution in power management by controlling power to Incandescent Loads, LEDs, Moving Lights and other applicable equipment. The patent pending design of the PCS TRIO™ power architecture enables power control over the widest lighting schedule possible in a single panel.

See additional materials for detailed information.

Plenum Modules are fully compatible with the entirety of the Lex Products PCS TRIO™ Module Chamber series of power control products.

PCS TRIO™

Plenum Module (PPP)

Mechanical

- Each module is labeled on its face as 'PPP' indicating **P**lenum/**P**lenum/**P**lenum.
- Plenum modules ship fully factory wired and ready for installation.
- Module components are housed in removable chassis comprised of 14 gauge powder-coated steel.
- The face of the module features dual molded grips for module insertion/removal.
- The rear of the module includes self-aligning communication connections to ensure integrity of contact.
- The left and right sides possess guides for accurate alignment of communication connections as well as molded spring clips for module retention. Guides also possess copper paddles to ensure proper grounding.
- Modules may be inserted and removed from PCS TRIO™ Module Chambers without the use of tools.
- Modules function without noticeable affect within an ambient temperature range of 32° F to 104° F (0° C to 40° C).

Recognition

- Plenum Modules are cULus Listed.
